

# Fenetex Ranks No. 89 on Inc. 5000 Manufacturing List

## Fenetex Corporation Achieves Exceptional Growth While Innovating in Outdoor Living Industry

Fenetex Corporation, a leading manufacturer of motorized retractable screen systems for the outdoor living market, has been recognized as the 89th fastest-growing privately held manufacturing company in the United States on Inc. Magazine's prestigious Inc. 5000 list. The recognition validates the company's position as a trusted engineering partner for custom builders, outdoor living dealers, and specialty contractors nationwide.

Since its founding in 2007, the motorized screen manufacturer has transformed from a regional player to a national leader in motorized screen solutions, with its patented track systems protecting outdoor spaces around the world. The company's exceptional growth reflects the booming outdoor living market and increasing demand for automated solutions that extend the usability of patios, decks, and outdoor entertaining areas.

"This Inc. 5000 recognition belongs to our entire dealer network," said Meridith Anzulis, Co-Founder and CEO of Fenetex. "Our growth is directly tied to the success of the contractors, dealers, and design professionals who specify and install our systems. We've built our business by solving real installation challenges and delivering products that enhance both projects and professional reputations."

### Addressing Critical Market Needs

The company's rapid expansion comes as the outdoor living market experiences unprecedented growth, with homeowners increasingly viewing outdoor spaces as essential extensions of their homes. Fenetex's motorized screen systems address multiple pain points for both contractors and end users:

- **Hurricane Protection:** MaxForce Hurricane Screen Systems are certified under the stringent requirements of the High Velocity Hurricane Zones in Miami-Dade and Broward counties, providing contractors with code-compliant solutions for extreme weather markets
- **Self Adjusting Tracks:** One-Track Screens use patented Quiet Spring technology to adapt to changing conditions improving the overall look and operation of screens

- **Zero-Failure Design:** Proprietary track technology eliminates common operational issues that plague traditional screen systems, reducing service calls
- **Installation Efficiency:** Streamlined mounting systems and pre-engineered components with backward compatibility reduce installation time and complexity for contractors

### Market Impact and Future Growth

The Inc. 5000 recognition comes as the outdoor living industry continues its expansion beyond traditional seasonal markets. Motorized screen systems have become essential components in luxury outdoor kitchens, resort-style pool areas, and commercial hospitality projects where climate control and insect protection are critical.

### About the Inc. 5000

The Inc. 5000 list represents the most comprehensive look at America's independent entrepreneurs and their contributions to economic growth. Past honorees include Microsoft, Meta, Chobani, Under Armour, and Oracle. This year's honorees demonstrated exceptional resilience and growth while navigating economic uncertainty and supply chain challenges.

### About Fenetex Corporation

Founded in 2007, Fenetex manufactures thoughtfully engineered solutions for the outdoor living industry. The company's patented One-Track and MaxForce Motorized Screen systems are designed and produced to serve the needs of custom builders, outdoor living dealers, and specialty contractors nationwide.
