

How to Set Up the Fenetex WiFi Hub

Getting Started:

- Download the Connector app
 - [Connector - Apps on Google Play](#)
 - [Connector+ - Apple App Store](#)
- Launch app, then proceed to create an account by selecting “Sign Up”

- Once it logs you in, select the “+” button on the top right side of screen

- Select corresponding Bridge from the list

Follow the prompts in order to add the new Bridge:

- 1st step: Power on the Bridge.
- 2nd step: Press and hold the ‘Setting’ button for 2 seconds . Once you see a flashing purple light it is on pairing mode.
- 3rd step: Select the device from the list. If it doesn’t show try being closer to your new Bridge and select ‘Refresh’.
- 4th step: Select the method in which the Bridge will be connecting to the internet. Keep in mind the Bridge can only connect to a 2.4GHz WiFi connection. If an ethernet cord is present, you can hard wire your Bridge.
- 5th step: Once paired, it will display a message saying ‘Bridge Connected’. Select ‘Next’.
- 6th step: You can now name your ‘Bridge’.

Create a new Room and Add Device(s):

This will allow you to name the room and select a picture to identify your new room.

- Select 'Add New Room'
- Select 'New Device'
- Select 'Radio Motor'
- Select the 'Roller Blinds' option.
- Then proceed with 'Add New Device'
- Select the 'Bridge' and choose 'Next'
- It will prompt you with two options, 'By Remote' and 'By Motor'
- 'By Remote' will be the easiest way to pair the Bridge.
- You will need to remove the back cover of your remote and select 'P2' then hit 'Next'.
- Tap 'Next' while holding down the 'Stop' button on your remote for at least 3 seconds, it will trigger a countdown of 30 seconds.
- Once paired, it will display a message stating the 'Done', then select 'Next'.
- Next step will be to choose a Device name.
- Then proceed to add a room for the new device. It will display the Rooms that have already been created.
- You have now successfully added the screen.
